

VIRAJ PARIMI

Email: vparimi@mit.edu ◊ (412) 626-1630 ◊ <http://people.csail.mit.edu/vparimi>

EDUCATION

- Massachusetts Institute of Technology (MIT)** Cambridge, MA
Doctor of Philosophy in EECS Present
Relevant Coursework: Algorithms for Inference, Robotic Manipulation, Computational Sensorimotor Learning, Theory of Computation
- Carnegie Mellon University (CMU) - School of Computer Science** Pittsburgh, PA
Master of Science in Robotics | GPA: 4.08/4 August 2021
Relevant Coursework: Computer Vision, Mathematical Fundamentals for Robotics, Graduate Artificial Intelligence, Statistical Techniques in Robotics, Planning and Decision Making in Robotics, Mechanics of Manipulation
- Indraprastha Institute of Information Technology (IIIT)** Delhi, India
Bachelor of Technology in Computer Science and Engineering (Honors) | GPA: 8.96/10 May 2019
Relevant Coursework: Statistical Machine Learning, Deep Learning, Advanced Operating Systems, Graph Theory, Numerical Methods, Computer Graphics, Natural Language Processing, Network and Systems Security, Parallel Programming

EXPERIENCE

- MERS** Cambridge, MA
Research Assistant August 2021 - Present
- Developed a multi-agent task and motion planner for multiple manipulators working in compact spaces performing tasks such as CAD assembly.
 - Working on safe skill learning by combining multiple hybrid-constraint concurrent automata with safety constraints and frame a formalism which can be deployed in manipulators working in shared environments.
- NASA HOME STRI** Pittsburgh, PA
Research Assistant August 2019 - August 2021
- Developed a robust multi-agent planner by combining timeline-based planning and hierarchical task planning frameworks and deployed the planner in a test-bed designed to mimic deep space habitats.
- RISS** Pittsburgh, PA
Research Scholar June 2018 - August 2018
- Developed a computationally scalable bayesian sequential learning framework for time-series forecasting with up to **4 orders of magnitude speed improvement** compared to other benchmarks.
- Precog** Delhi, India
Data Analytic Intern May 2017 - September 2017
- Devised data analytic tool for National Bomb Data Center (NBDC) working under National Security Guards (NSG) to generate analysis based on historic data.
 - Assembled tool that automates whole process from input stage to output stage where useful insights are passed upon user request.

PUBLICATIONS

- T-HTN: Timeline based HTN Planning for Multiple Robots** 2022

SELECTED PROJECTS

Automatic Reward Densification

MIT | May 2022

Prof. Pulkit Agrawal

- Implemented a system that is able to leverage classical planning over human specified PDDL models to automatically increase the density of robotic tasks with sparse, goal-based reward

Catching a Ping Pong Ball with an iiwa

MIT | November 2021

Prof. Russ Tedrake

- Programmed the kinematics of a Kuka iiwa using Drake to catch a ping pong ball with a ping pong paddle
- Applied finite-state machine (FSM) techniques to model the paddle's trajectory off equations of motion of projectiles while in a pre-initial-contact mode, while we switched to a PD controller with offset stabilization in the post-initial-contact mode

Sampling-based Planning in Discrete Space

CMU | November 2020

Prof. Maxim Likhachev

- Proposed a hierarchical decomposition algorithm where we discretize the continuous sample space of PRM/RRT algorithms in order to provide tighter completeness guarantees.
- Demonstrated the performance improvement of the proposed approach for 6-link robotic arm.

Lossy Compression using Neural Networks

CMU | May 2020

Prof. Zico Kolter

- Formulated quantization techniques to generate discrete latent space representations among image and text based autoencoder models without significant performance implications.
- Showcased that incorporating commit-loss to the learning process improved the compression ratio of both image and text based models while maintaining the quality of reconstructions.

COTTON

IIIT-Delhi | November 2018

Prof. Vivek Kumar

- Developed a light-weight work-stealing runtime for async-finish task parallelism which was energy efficient without incurring significant impact on the performance.
- Used different power saving drivers in combination with `cpufreq` to change the CPU frequency based on some task based heuristics.

Understanding Vulnerability of Communities in Complex Networks

IIIT-Delhi | May 2018

Prof. Tanmoy Chakraborty & Prof. Ponnurangam Kumaraguru

- Identified vulnerable nodes in communities defined in a complex network by investigating several global and community centric properties to observe their effects on underlying community structure of the network.
- Proposed a hierarchical greedy heuristic based approach with a novel task based extrinsic evaluation strategy to measure its robustness.

Autoencoder based Recommender System

IIIT-Delhi | November 2017

Prof. Angshul Majumdar

- Engineered a new recommender system for GitHub where users are suggested with relevant repositories to contribute towards based on profiles while leading a group of 2.
- Applied similar technique to single-celled RNA-seq data and showed better gene expression recovery compared to other alternatives.

Advanced Application for Social Media Analytics (AASMA).

IIIT-Delhi | November 2016

[Prof. Ponnurangam Kumaraguru](#)

- Collaborated with a team of 7 people to extend a tool launched by CERC Lab by incorporating sentiment model along with improvements in efficient data handling and depiction using redis queue for real-time utilization by more than 75 agencies.

Smart Glasses

IIIT-Delhi | April 2015

[Prof. Alexander Fell](#)

- Created a prototype to help blind people understand text and allow them to identify people they know.
- Selected as top 10 projects of the year and was showcased at the Delhi Mini-Maker Faire.

HONORS

Qualcomm Fellowship India - Finalist	2022
Full scholarship from advisors at CMU	2020
Robotics Institute Summer Scholar (35 selected from ~ 800 applicants)	2018
FICCI Scholarship, CMU	2018
GSoC Internship	2018
Dean's List, IIIT-Delhi	2017
Secured 99.7 th percentile among 1.5 million students in JEE Mains Examination	2015

ACTIVITIES

Reviewer Artificial Intelligence Journal (AIJ)	August 2022 - Present
Teaching Assistant Principles of Autonomy and Decision Making - MIT	August 2022 - Present
Graduate Research Assistant Model-Based Embedded and Robotics Systems Group - MIT CSAIL Research Group	August 2021 - Present
Graduate Research Assistant Intelligent Coordination and Logistics Laboratory - CMU Research Group	August 2019 - August 2021
RISS Admissions Committee CMU	January 2020 - March 2020
Undergraduate Researcher Laboratory for Computational Social Systems - IIIT-Delhi Research Group	August 2017 - May 2019
Undergraduate Researcher Precog - IIIT-Delhi Research Group	August 2016 - May 2019
Teaching Assistant Advanced Programming - IIITD	August 2017

INVITED TALKS

Planning under Uncertainty for Joint-Task Execution NASA HOME STRI	October 2020 Pittsburgh, PA
Computationally Scalable Bayesian Inference Framework Rapid Flow Technologies	June 2020 Pittsburgh, PA

SKILLS

Programming Languages	Python, C, C++
Tools and Technologies	ROS, Pytorch, Keras, HCLIB, CUDA, Git OpenCV, Docker
Languages	English (Fluent), Hindi (Native), Telugu (Native)
